O B J E C T I V E S

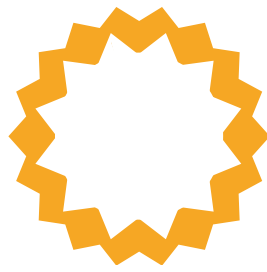

TECHNICAL OBJECTIVE

EXPLORE OUR FUTURE TODAY!

To have a sustainable lab facility enabling testing and, research and development work in the area of sustainable textile products, with raw materials like in organic , hemp, jute et al, and in processed like soya silk, recycled fabric etc.

Contact us at 9843025142 or fabricnsnmart@gmail.com.

Check out the full list of participating companies at www.NsNmart.com.

O B J E C T I V E S

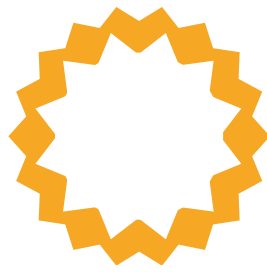

GROWTH OBJECTIVE

ENSURE OUR FUTURE TODAY!

To get recognised as independent body in quality testing and providing benchmarking standards with acceptance in further research work and commercial applications.

Contact us at 7838545499 or fabricsnmart@gmail.com.

Check out the full list of participating companies at
www.NsNmart.com.

O B J E C T I V E S

SOCIAL OBJECTIVE

WORK FOR OUR FUTURE TODAY!

To progress the commercial bodies into an ecosystem which is driven by quality and ethical standards, to ensure, trust, growth and well being of stakeholders across entire supply chain.

Contact us at 7838545499 or fabricsnmart@gmail.com.

Check out the full list of participating companies at

PROJECT PROPOSAL

PROJECT SUBJECT

"Developing Indian Subcontinent Hemp Fiber Benchmarking Standards, using comparative analysis with known benchmarks carrying global Fiber products in markets"

Project scope:

Testing sample quantities of hemp for quality parameters, identified by primary and secondary research done for commercially available and viable fiber/fabric varieties of textiles in global market.

Project estimate duration :

2 - 4 months

PROJECT RESOURCES

PROJECT EXPECTATION

NsNMart entity, co-owning the bench marking rights for the established standards, with the participating organisation/s.

Sample Fibers:

1. Decorticated hemp fibre
2. Mechanically cottonised hemp fibre
3. Boiled and mechanically cottonised hemp fibre
4. Boiled, bleached and mechanically cottonised hemp

Consultative Research Work:

2 - 4 months

PROJECT SCOPE DETAILS

PROJECT OBJECTIVE

NsNMart entity, co working the involving organization/s making evaluation parameters and benchmark rights in accordance to the well established standards, along with interests of prticipating organisation/s.

Suggestive Fiber testing methodology for setting the standardization process:

1. De segregate hemp fibre to individual modules for test
2. Mechanical and technological process documentation of testing process to bring efficiencies
3. Identifying hemp fibre parameters leading to standards categorization, suitable for segregating Hemp grown in Indian Subcontinent Grown, from commercially viable purposes
4. Understanding best practices for Growth, Processing (Mechanical and Chemical) and further treatment of Hemp Fibers.

REGARDS,

THANKYOU!!

Looking forward to connect.
